

CUBO

Add structure and style to your outdoor space with our modern square pots. A clean, contemporary design highlights the natural materials and timeless finish. Lightweight and easy to position, each pot can be used individually or arranged as a set. Optional dividers allow for flexible layouts, making them perfect for both home gardens and hospitality settings.

- ✓ Drainage hole in the bottom
- ✓ Weather and UV-resistant
- ✓ Versatile sizes & shapes

MAINTENANCE

CARE INSTRUCTIONS

Jardinico pots are easy to clean with water and a sponge or soft brush. Please do not use any chemicals and steam cleaner, high pressure cleaners or sharp tools to avoid any damage of your planter(s). Please ensure proper drainage with expanded clay or gravel and place the planter on pot feet (no saucers in winter time). We are not responsible for any damage due to improper use.

STORAGE UNUSED PLANTERS

We always advice storing the planters in a protected and covered location when not in use. In case of storing outside, it must be ensured that no water from rain, snow, frost, ... stagnates and/or condenses on the surface and in the planters in order to prevent discolouration or damage. Please follow the instructions below:

- Remove its nylon bag, shrink-wrap or cardboard.
- Use pot feet to raise the planter from the ground.
- Do not stack into each other. In the case of nesting, it needs to be raised inside the planter.

INSTRUCTIONS

To ensure proper drainage, avoid stagnation in the planter.

To prevent water logging, we recommend the installation of a drainage system:

- Cover the hole and the bottom of the planter with a filter fleece. This will prevent soil and other materials to congest the hole.
- Fill in with hydroton / expanded clay pellets to a height of 2 - 5 cm.
- Cover the hydroton with another layer of filter fleece.
- Fill up with potting soil.

IMPORTANT

Always put items on an EVEN surface in order to prevent them from compromising and deforming.
